

Perlenkinder
Uganda e.V.
kostbar • wertvoll • einzigartig

We plan to build a modern restroom facility with separate areas for boys and girls, as well as sinks for daily hygiene. This will not only meet the requirements for the children's home's official recognition but also sustainably improve the children's living conditions.

It gives us great joy to see that we can provide the local children with a proper, clean, and safe restroom facility. Good sanitation facilities are an important contribution to health, hygiene, and dignity—and thus another aspect for a better future for the children at the Perlenkinderhaus.

We would like to express our heartfelt thanks to everyone who supports and accompanies this project. Together, we can make a big difference!
