

Perlenkinder News Back to Uganda! October 2026

After having reported in our last Perlenkinder News about the birth of our little calf Bobby and the finalization of the first restroom building, we now have more good news from Uganda.

Developments on the ground have progressed extremely quickly in recent weeks. In addition to the first toilet building, which had already been completed, the relevant authorities requested a second toilet building. Furthermore, a separate washhouse with shower facilities for the boys and girls had to be built. Thanks to the support of our donors, we were able to carry out both projects in a short amount of time. Both buildings are now nearly completed.

Our impressions so far have been truly encouraging: The buildings make a very good impression and appear to be of high quality. The way the work is being carried out also gives us the sense that it is being done professionally and with great care. In this context, we also had the opportunity to meet the engineer in charge and were impressed by the professional collaboration and the way our project is being handled.

We are very grateful that we were able to take these important steps so quickly thanks to the donations we received. Especially as we continue to develop the Perlenkinderhaus, it is necessary to create structural conditions and meet the requirements of the authorities. This brings us another significant step closer to our goal of providing the children with a safe and suitable home.

From mid-October till the end of October, we will be visiting Buhoma again. During that time, we hope to get a firsthand look at the construction work and its results, carefully tour and inspect the new buildings, and take plenty of photos. We look forward to seeing the progress with our own eyes and then reporting about it in detail.

A heartfelt thank you to everyone who has made this progress possible through their donations and their support for the Perlenkinder. It's wonderful to see how this support develops!
